DUET Magnetic Backup Safety Hands-Free Backup Wrench

Benefits

MAGNETIC Back- up wrench for Hands Free Safety
Especially suited for pipe & flange bolting applications.

- 1 Hands Free Zero Pinch Points
- 2 Safe - reduces hand injuries
- 3 Quick Release - won't lock on
- 4 No Hammering - Non-Sparking
- 5 2 Hex Sizes in One
- 6 Fits in tight spaces
- 7 Less weight & toolbox space
- 8 No Slogging Spanners

The powerful embedded magnets effortlessly hold the tool's weight upside down creating hands free operation!

On non-magnetic steels & alloys, the DUET clamps directly onto the nut by reversing the Tension bolt into the nut Hex & tighten by hand, holding it Hands Free.

DUET wrenches are strength tested past the point of failure for a given bolt size.

The two-sizes-in-one DUET keeps the tool weight & size less than other Backup Wrenches. Means less Weight and more Space in your Toolbox!

Available in standard sizes from 19mm to 120mm and Imperial sizes plus Custom Size pairings made-to-order.

Smaller sizes are combined into a TRIO configuration ie: 24mm, 27mm & 32mm sizes on the one tool.
