SV60-SP Vacuum Loading Solids Pump

The Solidsvac SV60-SP is designed to reliably handle any flowable sludge and slurry and is ideally suited where submersible, centrifugal and diaphragm pumps are not a viable option.

Designed to offer the operator a one man vacuum recovery pressure discharge unit capable of recovering and transferring almost any flowable material, the extra heavy duty T-Port 75mm (3") suction and discharge rotary ball valve delivers outstanding performance in the capture and transfer of heavy flowable sludges with high solids content.

100% air powered, the all new compact, fully automatic, robust and fully mobile SV60-SP, generates 22.5"Hg+ of vacuum and can be used in a wide range of applications including mining and industrial.
